Their website form ended in an inbox.

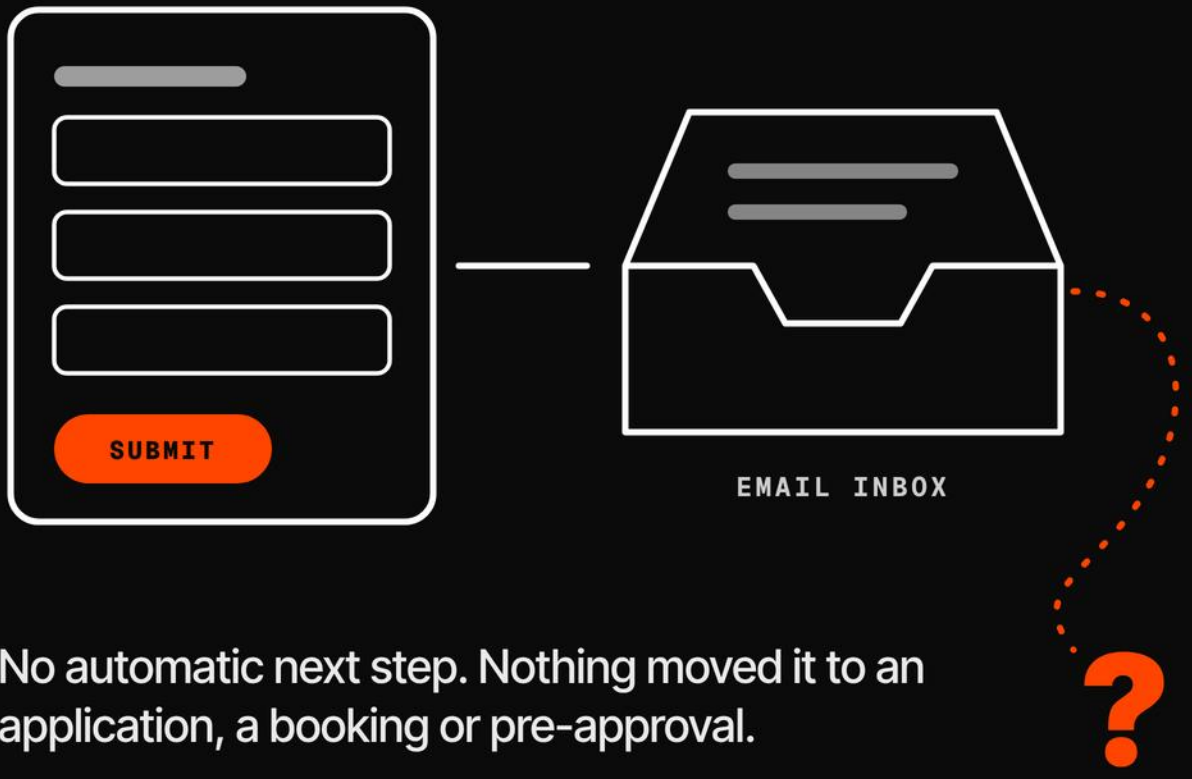

18%

37%

APPLICATIONS WENT FROM 18% TO 37% IN MONTH 2

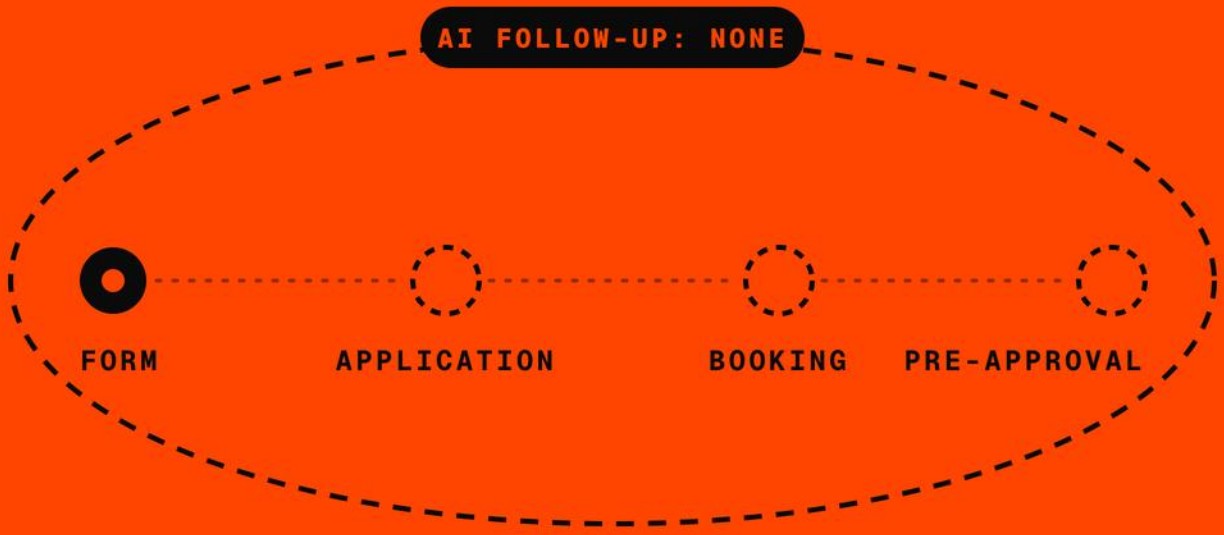

Someone filled in the form. It landed in email.

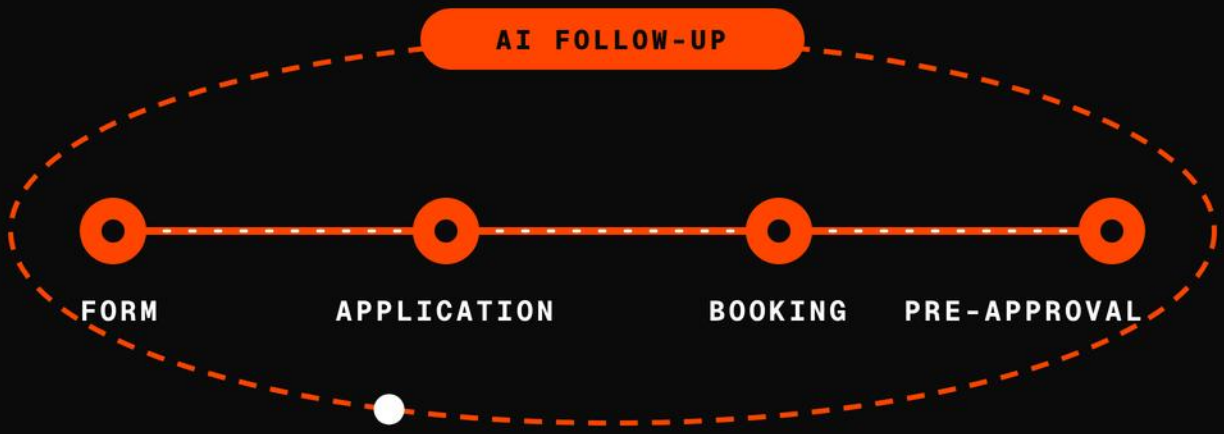

No automatic next step. Nothing moved it to an application, a booking or pre-approval.

Everything after "submit" was missing.

No path from form to application to booking to pre-approval. And no AI follow-up along the way.

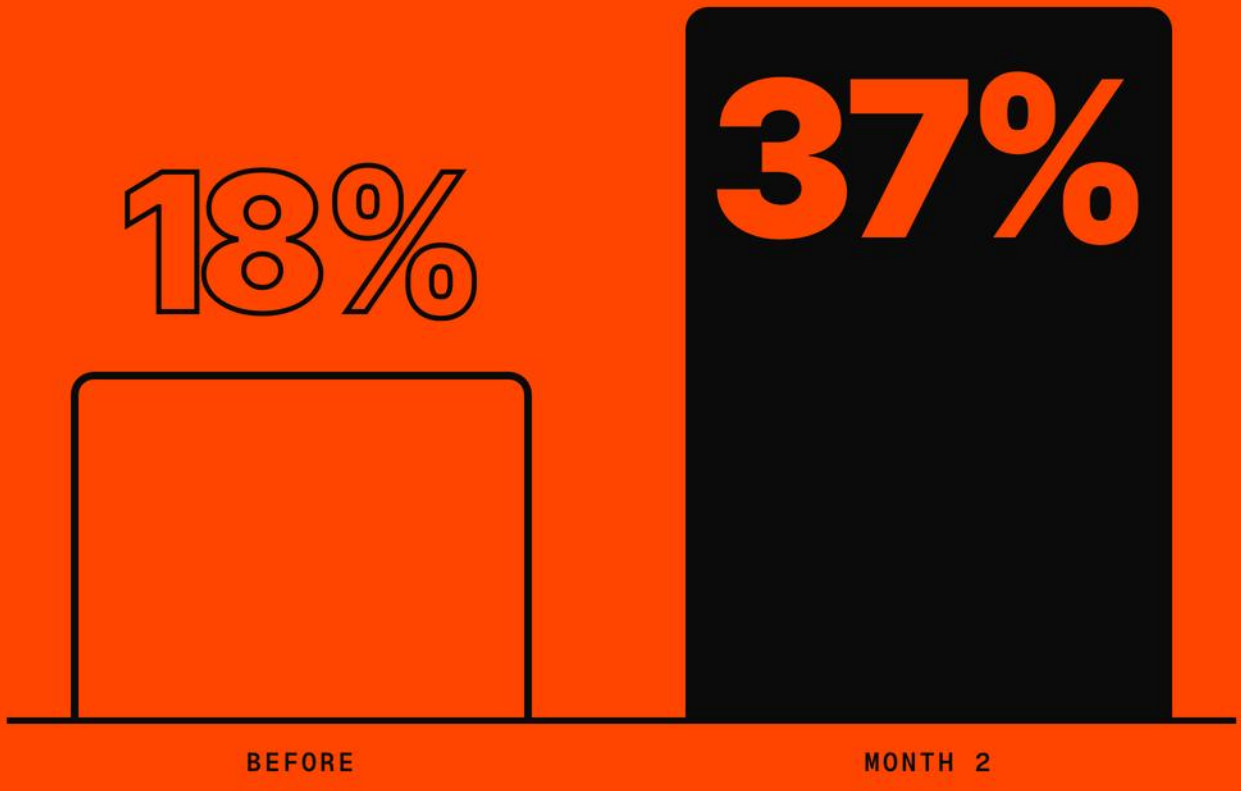

So we built the path.

1. **FORM**
   Someone enquires on the website.
2. **APPLICATION**
   The enquiry becomes an application.
3. **BOOKING**
   The application leads to a booking.
4. **PRE-APPROVAL**
   The booking moves on to pre-approval.

AI FOLLOW-UP Runs along the whole path.

Applications went from 18% to 37% in month 2.

And 10 hours a week back.

Send your own business a test enquiry.

1. Fill in your own website form.
2. Write down every step it reaches, and who has to touch it.
3. **Where it stops is your gap.**

Map your path.

Run your test enquiry, then fill in each box it actually reaches.

YOUR ENQUIRY PATH

WHERE IT STOPS _____

WHO HAS TO TOUCH IT _____

TIME UNTIL A PERSON REPLIES _____

What's the last step your form reaches? Tell me in the comments.
